Recently, I watched an **amazing** short movie about whales on the internet and it made me think deeply about what we do to our planet. Today, there are only a few whales alive so it's an endangered animal. Cheetahs, pandas, and Asian elephants are also among these animals. Oceans are the natural home of whales and other sea animals. Whales die because humans make the water dirty. **Dirty** water isn't healthy for them. Also many whale hunters don't care about wild life. They hunt these beautiful whales to make money and to have fun. I think whales and other endangered animals are a gift from Allah. People should keep the water clean and hunters should stop hurting them. I also hope countries start protecting them.

1. What does 'amazing' in the first line mean?

a) important ☐ b) wonderful ☐ c) interested ☐ d) happy ☐

2. Which one isn't an endangered animal?

a) horse ☐ b) cheetah ☐ c) Asian elephant ☐ d) panda ☐

3. 'Dirty' in line 4 means: ……

a. dangerous ☐ b) injured ☐ c) not clean ☐ d) healthy ☐

4. It isn't important for hunters to……. whales.

a) protect ☐ b) hunt ☐ c) enjoy hunting ☐ d) make money from ☐

5. Why do hunters kill whales?

……

6. How can people help whales?

……

Microbes are really interesting. They are everywhere! They live all around you, on you and inside you! Microbes are very small, so you can't see them. But don't worry. Some microbes make you sick but most others keep you healthy and even help you to fight disease. There are so many different types of microbes. We still don't really know how many there are, but we know that microbes do lots of different things. Bacteria and viruses are two important types of microbes.

Bacteria are really important microbes. They are very small. They have only one cell. Bacteria can live in any area of the earth. They aren't all bad; in fact you couldn't live without some bacteria! Viruses are among the smallest microbes on the earth, even smaller than bacteria. They are different from bacteria because they cannot live on their own. Viruses need to be inside a living cell to live and grow. There aren't many good things about viruses – they usually attack your body and make you sick!

1. Some microbes can be helpful. True ☐ False ☐
2. Microbe is an important type of bacteria. True ☐ False ☐
3. Bacteria do not need to be inside a living cell to live. True ☐ False ☐
4. Viruses can live in any place in the world. True ☐ False ☐
5. Where can we find bacteria?

……

6. How are bacteria different from viruses?
